

7 December 1966

POSSIBLE LEGISLATION

Parking

1. Legislation along the lines proposed in last Congress to provide for collection of parking fees from personnel now parking at no cost to the individual. These fees would be used to lease parking in areas where free parking was not available. All personnel would pay the same fee. GSA would administer the program.

2. Another possibility would be legislation to authorize GSA to lease parking areas for employees who now do not have access to free parking. This would not appear inconsistent in principle with the present legality of using appropriated funds to build parking lots on Government property.
